PROJECTS

1. Responsive Portfolio Website

Description : Built a personal portfolio website to showcase projects, skills, and contact information. Implemented a responsive layout using React components and CSS Flexbox/Grid. smooth scrolling, and form submission via EmailJS.

Key Features :

- Fully responsive design for desktop and mobile devices.
- Animated project cards and smooth scrolling navigation.
- Contact form with email service integration.
- Showcases skills, experience, and live projects effectively.

Skills Used : React.js, HTML5, CSS3, JavaScript (ES6+), React Router, EmailJS, Responsive Design, VERCEL

2. Task Manager (To-Do App) with Local Storage

Description : Developed a task management app with CRUD functionality to add, delete, update, and mark tasks as completed. Used React Hooks for state management and persisted data using browser's local storage.

Key Features :

- Add/edit/delete tasks
- Filter by completed/pending
- Data persistence with localStorage
- Clean UI and keyboard accessibility

Skills Used : React.js, useState, useEffect, JavaScript, CSS Modules, localStorage, Accessibility

3. Weather App using OpenWeather API

Description : Created a weather forecast app that displays real-time weather data based on user input. Integrated OpenWeather API for live data and implemented error handling and loading states.

Key Features :

- Fully responsive design for desktop and mobile devices.
- Animated project cards and smooth scrolling navigation.
- Contact form with email service integration.
- Showcases skills, experience, and live projects effectively.

Skills Used : React.js, REST API, Fetch/Axios, useState/useEffect, CSS Flexbox, Error Handling, Responsive Design
